

SUBRAMANIAN M

9790583194 | subrxmanian@gmail.com | [LinkedIn Profile](#) | [GitHub Profile](#)

Dedicated React Native Developer with over a 1.5+ experience specializing in high performance cross platform mobile applications. Proven track record of integrating RESTful APIs and Firebase services to deliver scalable, real time features. Committed to performance optimization and building user friendly, responsive interfaces that drive engagement and business value.

TECHNICAL SKILLS

Mobile Development: **React Native**, iOS/Android Deployment, Expo Go
Programming: **JavaScript (ES6+)**, **TypeScript**
Real-Time & Streaming: **WebRTC**, **Mediasoup**, **AWS AppSync** (GraphQL Subscriptions), **Socket.io**
State & Architecture: **Zustand**, Context API, Redux, Mobile App Architecture
Backend & Cloud: **Node.js**, **REST APIs**, JSON, **AWS** (S3, Amplify, CDN), **Firebase** (Auth, Notifications, Crashlytics, Performance Monitoring)
Tools & Performance: Git, GitHub, CodePush (OTA), **React Native Reanimated**, Caching, Payment Gateways (Cashfree, Razorpay)

PROFESSIONAL EXPERIENCE

React Native Developer

Thinks Strive Solutions Nov 2024 – Present

- Developed and deployed cross platform mobile applications with improved performance and scalability.
- Optimized API calls and app performance, reducing load times by 20%.
- Implemented push notifications using Firebase, increasing user engagement.
- Integrated AWS S3 for secure file uploads and storage.
- Improved UI responsiveness and user interaction across multiple devices.
- Built custom validation systems reducing form errors by 35%.

React Native Developer Intern

Kite Career May 2024 – Nov 2024

- Built mobile applications integrated with Laravel backend services.
- Implemented push notifications using Expo and Firebase.
- Developed responsive UI using Flexbox for smooth user experience.
- Created validation logic for forms including government ID inputs.

PROJECTS

FLYKUP (Live Commerce & Entertainment Super-App)

Architected and developed a comprehensive React Native ecosystem combining low latency live video streaming, real-time e-commerce (bidding/flash sales), and short-form video feeds. Engineered multi tiered dashboards for buyers, sellers, and logistics partners, driven by a robust AWS Serverless & WebSocket backend.

Low-Latency Live Streaming & Interactive Commerce

- Integrated WebRTC and mediasoup to deliver ultra-low latency live video streaming, capable of supporting high concurrent viewer counts.
- Engineered complex overlay systems using AWS AppSync (GraphQL subscriptions) to handle synchronized Live Auctions, Flash Sales, and Giveaways directly within the video stream with millisecond accuracy.
- Implemented advanced media features including Simulcast routing and Picture-in-Picture (PIP) to ensure uninterrupted viewing experiences while users navigate the app.

Full-Scale E-Commerce & Multi-Vendor Architecture

- Architect specialized, role based interfaces and workflows for Buyers, Sellers, and Shippers seamlessly inside a single application.

- Built diverse checkout flows from static e-commerce carts to dynamic Live Auction checkouts and bundled flash sale checkouts handling deep state management with Zustand.
- Integrated major payment gateways (Cashfree and Razorpay) allowing secure, instantaneous transactional flows and integrated in app Wallet capabilities.

Short-Form Video Feed (Reels) & Feed Optimization

- Built a highly performant, infinite-scrolling short-video feed (similar to Reels/TikTok) utilizing virtualization and custom caching (react native video, react native blob util) to provide zero-buffer video playback.
- Resolved flat-list layout thrashing by separating high-frequency re-renders (likes, share counts, tracking) from the heavy video component tree.

System Architecture, OTA Updates & Performance

- Implemented seamless, invisible app updates using CodePush (@revopush/react-native-code-push), achieving CI/CD deployment pipelines that bypass App Store review delays.
- Leveraged AsyncStorage and filesystem caching to support resilient offline states and dramatically improve cold-launch speeds.
- Designed a high frame-rate UI using react-native-reanimated, nativewind (Tailwind), and lottie-react-native to run complex interactive animations (confetti cannons, rolling modals) natively at 60 FPS.

Chat Application (React Native + Node.js)

- Architect a scalable real time messaging system using WebSockets and Node.js for high-concurrency communication.
- Collaborated on full cycle deployment, implementing secure user authentication and live presence tracking.
- Executed performance optimization for real-time features, ensuring low-latency delivery of messages and notifications.

EDUCATION

Bachelor of Computer Applications (BCA) – 72%

Dr. N.G.P Arts and Science College

2021-2024

ADDITIONAL STRENGTHS

- Strong understanding of OOP concepts
- Experience debugging and performance optimization
- Quick learner with strong problem-solving skills
- Effective team collaboration and communication
